## PEARY ALMOST REACHED POLE

He Got Within 203 Miles of the Goal So Long Sought.

NEW RECORD IN THE ARCTIC

Expedition Suffered Severe Privation Explorer Telling of His Thrilling Adventure-Coming Home.

New York, Nov. 3 .- H. L. Bridgman, secretary of the Peary Arctic club, received advices from Commander Peary showing that the explorer failed to reach the north pole, but that he made the farthest record north, \$7: degrees 6 minutes, which is within about 203 miles of the pole.

Commander Peary's polar steamship left New York in search of the north pole July 16, 1905. The vessel, for which funds were furnished by the Arctic club, of New York, cost about \$100,000, and had a crew of 20 men under Captain Bartlett. Commander Peary did not go with the ship from New York, but joined it at Sydney, Cape Breton, where Peary took on coal and additional supplies. and left Sydney July 26 for the dash toward the pole.

When nothing was heard from the expedition by July friends of the Arctic explorer, who expected a message of some kind by June, began to be worried. This idea was not shared by the Arctic club, which did not expect to hear from Peary until October or November. It was explained that his only way of getting news from the north was by whaling ships. In an interview before he left New

York Commander Peary expressed confidence in the success of the venture. He explained that nearly all the men accompanying him were members of former Arctic expeditions and thoroughly familiar with the work. He said: "This is my ninth trip to the Arctic and, barring sickness, I will give the pole the hardest try it has had yet. I hope to win. There are three strong points in my favor: First, the most powerful Arctic beat ever built; second, my knowledge gained by 19 years in the Arctic, and third my knowledge of the Esquiman and how to handle them."

Peary got nearer to the pole than the Duke of Abruzzi's expedition, which led the Arctic record, 86 degrees 34 minutes. What Commander Peary did and his experiences during the past year in the frozen north are briefly but vividly summarized in a communication received by Herbert L. Bridgeman, secretary, of the Peary Arctic club. This communication, dated at Hopedale. Labrador, via

Twillingate, N. F., is as follows: "The Roosevelt wintered north coast Grantland, somewhat north Alert winter-quarters. Went north with sledges February via Heckla and Columbia. Delayed by open water between 84 and 85 degree. Beyond 85 six days. Gale disrupted ice, destroyed caches, cut-off communication with supporting bodies and drifted due east-Reached 87 degrees 6 minutes north latitude over ice, drifting steadily eastward. Returning ate eight dogs. Drifted eastward, delayed by open water, reaching north coast Greenland. in straitened condition. Killed musk oxen and returned along Greenland coast to ship. Two supporting parties driven on north coast Greenland. One rescued by me in starving condition. After one week recuperation on Roosevelt sledged west, completing north coast Grantland, and reached other land near 100th meridian. Homeward: voyage incessant battle with ice and head winds. Roosevelt magnificent ice fighter and sea boat. No deaths or illness in expedition.".

Mr. Bridgeman said the receipt of the news was a surprise to him, hecause he supposed it to be too late in the season for Commander Peary to send word of his venture. Mr. Bridgeman added that the message speaks for itself, and that since he does not know more of the results of Commander Peary's effort to reach the pole he could hardly comment on the dispatch. There is little doubt, he said, that Commander Peary is coming. home. This seems to be borne out by the routing of the dispatch.

Hopedale, or Hoffenthal, is a missien station on the east coast of Labrador. Twillingate is a port on the east coast of Newfoundland. Mr. Bridgeman said the message was probably mailed by Commander Peary from Hopedale to the most accessible cable point.

Peary planned to have his headquarters 350 miles north of Cape Sabine. From that point he planned to make his actual journey to the pole, a distance of 500 miles, across a desert of ice and snow. The final dasa he expected to accomplish in a month er six weeks:

Girl Fatally Burned.

Columbus, O., Nov. 3. - Agnes School, 15, who was horrible burned. Thursday afternoon while burning dry lived she would have been horribly with says the cases will all lived she would have been horribly ed for trial at the next term of court. disfigured and a cripple for life.

## COLOR LINE.

Trouble Between Races. Havana, Nov. 3.—In a demand made

on Governor Magoon for appointment

to the position of one of the government subsecretaries of Senator Morus Delgade, leading negroes of the island A Caustic Retort Provoked by the clearly outlined their determination to force the provisional government, if possible, to recognize them as one of the political elements to be reckoned with. The negroes want offices and they assert they will never drop their agitation until Senator Del Gado and General Juan G. Gomez have been but No Deaths Nor Sickness Unexe given important positions. The activity pected Message From the intreplet of negro leaders in seeking preferment at the hands of the provisional government is deemed by many persons here as exceedingly manacing and likely to bring the race question to the front in a way to cause serious trouble. With the success of the revolution in overturning the former government the negroes have assumed to make demands they would never have dreamed of before. The appoint- an interview. ment of blacks to office is certain to offend the whites, and the insistence of the negroes for just such recognition has brought about a situation that may easily become critical.

Claims He Has a Contract, Havana, Nov. 8 .- S. E. McGivney, acting for the Rokeby Contracting tion into a partisan campaign and into company of Jersey City, filed a brief with Governor Magoon, alleging that he holds a contract for paving and the municipality be instructed to make arrangements for the company to begin work. After various deays arising from the consideration of 000 was signed in January, 1802, between the Rokeby Contracting company and the authorities of Havana.

Some Negroes Released. Atlanta, Ga., Nov. S .--- Of the negroes indicted in connection with the murder of the policeman, Head, during the September riots, 19 were ordered released. The evidence against them was considered insufficient to warrant holding them for trial. But 23 of the indicted negroes under arrest will be hold for trial for murder, and against them evidence is practically the same as against Alexander Walker, who

was given a life sentence. Rockefeller's Gift. New York, Nov. 3.-It was announced that John D. Rockefeller made to the American Baptist Heme as much more by April

# Politica in Cuba Threatened Wish REPLY TO ROOT BY W. R. HEARST

Utterances at Utica.

### CHALLENGE FOR M'CLELLAN

For Defense of His.Congressional Record Hearst Declares That His Railway Measure Was Stolen and Made the Basis of Legislation Without Giving Him Credit For It.

New York Nov. 3.-A caustic reply to strictures in Secretary Root's speech at Utica Thursday night was made by W. R. Hearst in the form of

"Mr. Root, a public official who occupies a high place in the United States government," said Hearst, "and who should represent the whole people of these United States regardless of party, has dragged his high posiis personal attack in a local situation

to serve his corporation masters. 'Last year Mr. Ryan issued through sewering Havana, and requesting that Mayor McClellan postal cards bearing libellous and indecent attacks upon me which the United States government stopped in the mails. This year Mr. Ryan puts forth those same inother hids a contract for the paving dictments and slanderous attacks and sewering of Havana for \$10,649, through his corporation attorney, through a man who is still his faithful servitor though in public office and partly paid by the people.

"I have said I am proud of the enemies I have made, and I am prouder of none than I am of Elihu Root, Boss Croker and Pat McCarren.

"You know that this man Root is opposing me because I fought the corporations that own him, the street railroad trust and the whisky trust and the steel trust and the sugar trust and the gas trust, which employ him. "Mr. Root objects to my opposition to McClellan and calls him a worthy heir to an honored name. I say that McClellan has stolen the office he now holds and he knows that he has stolen it, and that the proof of his theft is in those ballot boxes, and I challenge him now to open those ballot boxes. Mission society a conditional gift of see how Mr. Root; the corporation \$75,009 toward the rebuilding of de lawyer and employe of Thomas F. stroyed and injured Haptist churches, Ryan, can indorse George B. McCleiin and about San Francisco. The con- lan, the political puppet of Mr. Ryan sular agent at Lancaster. England dition is that the society shall raise and errand boy of the trusts, but can and a political correspondent for New

> everywhere threatened?" In like manner Hearst replied to references made by Root to Jerome, Taggart, McCarren and Croker, stat ing his reasons for opposing these men in terms applied to them in speeches and in his papers.

> tion in New York city and the crime

Referring to his suits against the coal trust in courts before the interstate commerce commission, Hearst said: "Because of the interminable delay and inadequate powers of the interstate commission I had introduced the railroad rate bill in congress which the Republican party takes the credit for. I positively assert that the Republican party stole the greater part of my bill, and that they would have a better bill if they had stolen all of it. And that is also my answer to Mr. Root's criticism of my course in congress.

Hearst said he does not conduct either his papers or his campaign according to personal prejudices, and said in conclusion:

"Finally. I say that the same recoghized and unwritten rules that makes the president of the United States president of all the people should apply to the officers of his administration, and that when Elihu Root, secretary of state, shall drag his office into a state election and make a partisan attack in a personal and partisan speech, he degrades his office to his own level.

### Bryan Standa by Hearst.

Omaha, Nov. 3.-William J. Bryan 1902. Both companies have pleaded when shown the extract from his letter indorsing the candidacy of W. R. Hearst for the governorship of New York said: "That letter is authentic. I have been writing letters and giving out interviews all through the campaign to the same effect. I have in
1 have been writing letters and giving out interviews all through the campaign to the same effect. I have in
14 7005 10; heifers, \$2 5004 25; cows. I have been writing letters and giving dorsed Mr. Hearst and I want to see him elected. I saw a statement given out by the Bryan league of New York in which it was announced that, while the league was doing all it could in the interest of the ticket, it was opposing Mr. Hearst: I immediately wired Willis J. Abbot protesting against the use of my name by any orgenization against Mr. Hearst." When his attention was called to the speech of Secretary Root in which the secretary denounced Hearst in unmeasured terms, declaring at the same time that he was expressing the sentiments of President Roosevelt and by Mr. Roosevelt's authority, Mr. Bryan said: "It seems to me that the Republicans in New York must be very badly when the first of 15 or more indict frightened when they bring the presiments against the alleged plumbers' dent into the controversy, and especially in the way they have."

### BUCKEYE BRIEFS.

Giving Synopsis of Ohio Happenings. Farmer's Frenzy.

Marion, O., Nov. 3.-William Notter, 35, a farmer, who lived several years a short distance from this city, went violently insane while working in the fields. He went to the house, quietly but firmly overnowered his wife and two small children, bound and gagged them, securely tying them to bedposts. Then he set fire to the house. Notter got his shotgun after. he had tied his victims and applied a brand to several piles of old clothing saturated with coal oil. He then stood in the front yard and calmly watched the flames. By a superhuman effort Mrs. Notter, who is a frail and delicate woman, managed to sever with her teeth the cords which bound her. Quickly liberating the children, and with one under each arm, she darted out into the yard just as the walls commenced to fall. She and the babes were frightfully burned, but their wounds probably will not prove fatal. Notter started to blow out his brains when he saw that his victims escaped, but on second thought made a break and disappeared in the woods. He was captured after a hard chase and delivered to the sheriff.

Threat Against an "Apostle," Springfield, O., Nov. 3.—As a result of filing an affidavit against the sons of well-known families in the neighborhood of Trement City by J. W Harris, bas feeling exists between the villages and the sect of which Harris is the head, and may result in violence. One of the best-known farmers in that section said that if things did not mend Harris would be run out of the community, "on a rail if necessary." Harris, who was until several years ago a molder working in one of the foundries of this city, started the new sect called the Christian Nation; and holds forth in Tremont.

Says He Spont Inheritance.

Cleveland, O., Nov. 3, In deposition William T.-Clark, son of the late mil lionaire Standard Oil magnate James A. Clark, says he lost the greater part of his inheritance in wildcat oil ventures. Rated as a very rich man, he swears that his, entire property is worth, only \$27,000. His wife. Mary Clark in her petition for divorce and allmony said he owned many bonds and stocks and much real estate. The case was tried last summer. She charges that he eloped from Cleveand with Mrs. Nettie Biglow. Clark denies this in his deposition.

Noted Newspaper Man. Cincinnati, O. Nov. 3.—Charles Eustis Kincaid, former United States confork and San Fran Washington, died in the City hospital. here, aged 51 years. He was promiby which the rights of citizens were outraged and the liberties of citizens; nent in New York, for many years serving in Anderson county as judge, as first railroad commissioner in that state, as private secretary to Governor Proctor Knott, and in other capacities. For the last 11 years he was with the Cincinnati Enquirer.

# Found Dead in Bank Vault.

Salem, Ind., Nov. 3. - Charles B. Williams, bookkeeper of the Citizens' bank and acting as cashier, was found dead in the vault of the bank. A load of shot from a shotgun had penetrated his heart. The gun was kept in the bank vault and it is believed Mr. Wil liams in changing its position aceddentally discharged it.

Generally speaking, you are perfectly safe from lightning anywhere within twenty feet of a properly insulated lightning conductor.

# JAP ARRESTED IN PHILIPPINES

He Sketched Fortifications and Is Supposed to Be a Spy.

### ARMY OFFICERS ARE ALERT

Japan Played Just Such Tricks on Russia Before the Manchurian War. Prisoner Will Be Relieved of His Drawings and Deported - Japanese Navy Officer In Disguise.

Manila, Nov. 3. - In military and government circles the arrest of a Japanese thought to be a spy caused a great sensation, especially in view of the agitation in progress in Japan against the United States because of the discrimination shown Japanese schoolchildren in San Francisco. It is expected that diplomatic steps will be taken at once to question the Japanese government as to the meaning of such an unfriendly act. That grave complications may come as a sequence to the incident is regarded as within the range of possibilities.

The prisoner, who has a commission as a captain of engineers in the mikado's army, was caught while in disguise as he was sketching certain fortifications of Manila harbor. He was placed under arrest and steps will be taken to have him deported immediately. A search of the officer's effects brought to light several well-executed sketches of forts in the islands, on which were annotations showing the arrangement of guns, distribution of soldiers stationed in each fort and general comments on the effectiveness of the defenses. Steps were taken by the military authorities to see that none of the officer's drawings get out of the islands if they have not been sent. The mails will probably be examined to see if they contain any suspicious letters or documents being sent to Janan

Much of the information on which the Japanese prepared for their war with Russia was procured in this manner, and there is little question that the recent anti-American axitation in Japan caused the Tokyo government to take such staps with reference to the United States, especially in the Philippines.

It has been suspected for some time. that the Japanese army has scouts at Work secretly, not only in the Philin pines but an the United States. Not long ago the charge was made that many, of the Japanese stewards and mervants on United States men-of-war were officers of the mikado's navy in disguise, and instructions were sent to commanders to be on their guard.

### COURT PROCEEDINGS

To Force Open All of San Francisco's Schools to the Japan

San Francisco, Nov. 3. - Secretary Metcalf had a conference with the Japanese consul Hyeda: District Attorney Devlin commissioner of immigration, justices of the state supreme court and of the United States court of appeals. The result of the conference was not made public. The administration at Washington has taken steps to aid the Japanese of this city in their fight to secure admission to the public schools of San Francisco. The United States attorney general, Moody, instructed the United States district attorney, Robert T. Devlin, to lend his aid to attorneys representing the Japanese community in the injunction proceedings brought to compel the board of education to allow Japanese children to enter any of the schools of the city to which white children are admitted.

District Attorney Devlin refuses to discuss this latest order. He refers all questioners to Secretary Metcalf. One of the attorneys for the Japanese stated that he requested the court to suspend proceedings pending the investigation being made by the secre tary of commerce and labor.

### Balloonist's Trip.

Pittsfield, Mass., Nov. 3.-Leo Stevens, a balloonist, made an ascent from this city in a strong northeasterly wind. He went up about 2,000 feet and them disappeared in a southerly direction. The balloon passed over Lenox and was seen later from North Otis, which is about 20 miles southeast. Stevens expected to remain in the air part of the night. About midnight the Aero club received a telephone message from Stevens saying that he landed at South Sandisfield, near the Connecticut line. The trip was uneventful.

### Castro's Condition.

Fort de France, Martinique, Nov. 3. -Passengers arriving here from Venezuela bring the information that President Castro, whose health has improved, was removed Oct. 25 from the coast to Caracas, and Oct. 27 from Caracas to Sabana Grande, near the capital. With the exception of those ministering to him none is permitted to come near the president. Business in Venezuela is unsettled.

Riverman's Last Voyage. Cincinnati, O., Nov. 3. - Captain John Joseph Kennedy, 34, a ploneer | that.—Philadelphia Ledger.

### ecutives of Pittsburg. OPEN SHOP.

Streng- Organization of Corporations Makes it an Issue. New York, Nov. 3. - The National

Erectors' association, comprising manufacturers and erectors of steel structures, voted to continue its contest for "open shops.": The association adopted a resolution to support the Illinois Steel company of Chicago, which is building a plant at Gary, Ind., where a strike was declared Oct. 31 by the housesmiths and bridgemen's union. Among the concerns represented at the meeting were the American Bridge company, Pennsylvania Steel company, McClintock & Marshall, Phoenix Bridge company, Wisconsin Bridge company, Riter-Conley Manufacturing company, Pittsburg Construction company, Fort Pitt Bridge company, Hoyl & Patterson company, S. P. Mitchelf, Illinois Steel company, Post & McCord, Cooper iron works and Milliken Brothers. It was said that overtures were received from the international organizations of housesmiths and bridgemen requesting a conference at which the state of trade might be discussed. It was decided to reject these overtures.

### Strike Declared Off.

Washington, Nov. S .- The strike of machinists on the Southern railway, which was inaugurated recently for an increase in wages, was declared off and the men will return to work Monday without prejudice on account of the strike. The men who remained with the company are to continue at work. Those who have been employed since the strike will be retired from the shops before Monday morning, but without prejudice as to their continued employment by the company in. other places, or as to their future emplayment in the shops if needed. The wages offered to the machinists prior and the proposition to arbitrate the difference between that scale and the demand of the union was accepted.

-Wants Troops to Fight Strikers. New York, Nov. 3.—John-W. McIntyre, attorney for the New York Tansportation company, said the company will ask Governor Higgins for state militia to protect its chauffeurs. as the police on account of politics are acting in sympathy with the strikers.

### DRASTIC DISEASES.

Ravages of Consumption in the Navy. Offensive Malady In Quam.

tion. Nov. 3.—The report o Admiral Rixey, surgeon general of the navy, shows that in 1905 the number of tuberculosis cases in the service was 243, which is 66.1 per 1,000. In 1895 the ratio was 3.2. Practically all cases are pulmonary tuberculosis.

Admiral Rixey's report shows that the marines who went to the canal zone on the Columbia were quartered there from May to July and were great sufferers from malaria. Between July 13 and July 21, the time of the arrival at Boston, 215 of the 298 officers and men suffered acute malarial paroxysms. The return to northern climate banished the malaria rapidly and no cases proved fatal. Most of the men were bitten by mosquitos

while encamped near Corozal. An infectious, painful and repulsive disease is reported by Admiral Rixey as being prevalent in Guam. Naval surgeons are studying and treating the disease, which has so far been confined to the natives. Rhinopharyngitis mutilans is the name of the disease, which is an ulceration that destroys the nose and upper portions of the face. At present there are about 200 cases on the island.

### Peonage indictments. Atlanta, Ga., Nov. 3.—Five indict-

ments for peonage against well known manufacturers were returned by the federal grand jury here as the result of a special investigation by the as-Washington. Those indicted are F. ### The Seanet Writers. The fashion of sonnet writing was at

its height in the sixteenth century. when Rousard, the French "prince of poets" in his own country and generation, wrote over 900 sonnets, a total to the strike are to apply from Nov. 5 | which appears only to have been exceeded by Gomez de Quevedo, the Spanish Voltaire, who is said to have written over 1,000. Fortunately for sonnet lovers some of the best poets have been prolific sonneteers. Petrarch, who created the classic model which later poets similated, wrote 315. Camvens is responsible for 352, Sir Philip Sidney wrote 108. Spenser 88 and Dante 80. English sonnets were first written by Sir Thomas Wyatt (1503-42) and Henry Howard, earl of Surrey (1517-47), and the first appearance of any in book form was in a rare publication briefly known as Tottle's Miscellany," the full title being "Sorigs and Sonnettes written by the Right Honoure Lorde Henry Howard, late Earle of Surrey, and other." The greatest sonneteers of our language are Shakespeare, Milton, Wordsworth and Ros-

> Tiger and Vulture of the Sea. . If the "killer" whale is "the tiger of the sea," as the writer of an interesting article in the September Windsor has it, the oreas surely are the vultures of the ocean. In connection with whale catching the author of this interesting natural history article tells of the following incident: Some years ago a whaler in the northwest had killed a large whale and had the animal alongside when it was attacked by a school of oreas. They doubtless were half starved and, crazed by the scent of blood that extended away a long distance, probably followed it up like hounds, immediately attacking the whele. The men, with spades and lances, cut and slashed at them, inficting tarrible blows, yet despite this the orcas literally tore the whale from

Ule heavy silk or soft suede and workhin the dots with bends and the rest of the pattern in oblong and round spanales. The bag is made alike on both sides and has a fringe of beads added to it as a border.

With gray silk use steel beads and silver, spangles; with black use jet

FAMBROIDEBED TREATER BAG.

and black spangles, or a dainty and beautiful bag may be made with white or yellow silk done in yellow or gold beads and gold spangles.

Prefty bits of brocade and lightweight bits of furniture tapestry also make lovely bags by following the woven pattern in putting on the headwork. There are little novelty houses dealing in the clasps and chains where the bag may be lined and mounted and where the beads and spangles in colors and sizes may be obtained. Steel chain and clasp should be used for the gray, gilt for the ,yailow and gun metal for the black.—Philadelphia North American.

Known by Their Color. A white card on a Parisian dwelling house indicates that furnished apartments are to let. A yellow card informs pedestrians that unfurnished rooms may be had. The object is to maye passers by the trouble of crossing the street if they chance to be on the opp site side, in case such rooms as they desire are not advertised.

### HOTEL TIP TRUST.

Cont Boys Turn Gifts From Generous

Patrons Over to Concessionuaire. The latest thing in trusts is the tip trust in New York. By its operations every tip slipped into the hand of the boy who checks coats and hats in the big hotels and restaurants goes, not to the boy, but into the pocket of a concessionnaire, says the New York Times.

The hotel boys, it appears, are not employed in most instances by the swners of the hotels or the restaurant proprietors. A contractor comes along and offers to pay the botel so much for the privilege of running the hat racks and the coat rooms. It is he, not the hotel, who employs the boys, and it is he who rakes in the tips presented to the attentive boy by good natured patrons.

The boys, of course, make something. It averages from \$6 to \$9 a week. As the concessionnaire receives nothing from the hotel and as he employs on an average six boys to every big hotel, the amount in tips received by him leaves a considerable profit. The method by which the trust works is this:

The concessonnaire pays so much to the hotel for the privilege of running the hat racks and the coat room. He employs his own boys, one of whom is appointed secretary, lieutenant or spy. The term varies in various hotels. This secretary, lieutenant or spy has a leather pocket about twelve inches deep and six inches wide. Into this the hotel boy drops the tip given to him by a more or less thoughtless patron.

The secretary, lieutenant or spy makes a business of noting every customer as he comes in. If he wears an overcoat he sends a boy to see that it is placed either on the rack or in the coat room. The secretary or spy keeps an eye on each guest and is always réady to seud a boy posthaste when the guest seems ready to go. He then watches if the person whose hat is handed to him or whose coat is helped on hands a tip or not. When the visitor has departed the secretary of the concessionnaire fixes a hypnotic eye on the hotel boy, who, conscious of the eye, comes forward and drops the tip into the leather vocket.

Occasionally the concessionnaire's lieutenant visits the coat room and helps himself to what has been dropped into the canary, and the ground hog tried the tray there by departing guests. In to burrow the velvet violet lining of the evening the concessionnaire comes; the conversation chair, and the Maltese along and empties the leather pocket cat and the green parrot determined a of his secretary, lieutenant or spy into his own pocket. At midnight he calls again and rakes in his shekels.

For months the boys ostensibly employed in the big hotels have been writhing under the yoke of this trust. They say that they are compelled to be polite to patrons and to smile a blessing upon every guest who presents to them a dime or a quarter, and as they don't really benefit by the tip it is hard.

### AIRSHIP ON NOVEL LINES.

Milwankee Mechanic's Device Has

Neither Wings Nor Balloon. Jacob C. Miller, a mechanic in Milwankee, has invented a new kind of airship, says the Chicago Record-Herald. It differs radically from all others thus far exploited. Miller dispenses with both wings and balloons, also with engines.

The flight is regulated by a series of funnéls of aluminium. The small ends are uppermost and closed. Gasoline mixed with air is admitted to the funnels, and when sparked the explosion which follows comes directly against the atmosphere. The lifting power is dependent on the number of the funnels and the rapidity of the explosions.

All the funnels will be joined and placed on a frame, which will admit of their being changed to any angle. Two levers will control the craft. To ascend the funnels will be placed in a perpendicular position, so the explosions will be downward. To turn to one way or the other, to go shead or back, the founds will be so regulated as to cause the explosions to exhaust themselves opposite to the direction in which the skipper of the airship wishes to go. Simplicity is the keynote of Mr. Miller's ship.

A Laborers' Exposition, An international exposition portray ing the life of the laborer for the past 2.000 years, showing conditions surrounding him from the time of feudal slavery to the present time, is contem-

plated by the French parliament. The New Football Rules. There is this to say for the new football rules, says the Topeka Capital: When one of the players is injured the spectators have a chance to see how it

### NOVEL CHARIVARI.

Nonh's Ark Surprise For Two Newly

Wed Devised by Odd Fellows. Henry L. Dunning of Montclair, N. J., married Miss Edith Susan Woodborne of that town. He belongs (belonged, he is married now) to the Watchung Odd Fellows lodge, and when the Odd Fellows heard that Dunning had gone and got married they planned a party, says the New York World. At 7 o'clock the other night Dunning was sitting in his Morris chair in the front parlor reflecting upon his felicity, while Mrs. Dunning was putting away the tea things.

Then the Odd Fellows came cuiting up down the street, and the bewildered Dunning imagined that he was Noah. In the van of the party David Carroll was compelling a refractory and inexperienced bull calf to "giddap." Behind him John K. Barmore was guiding a six weeks' piglet by the simple process of twisting its tail.

But unfortunately in the ensuing noise the quip failed to be

In the wake of the zoologists-still more Odd Fellows brought dressed chickens, cabbages, cauliflowers, potatoes, turnips and other fruits of the earth. Then they all rollicked into the house, and the calf clambered on the Morris chair, and the shoat commend-: ed himself to the underpinning of the piano lamp, and the bird dog pointed little matter of precedence, and the squirrel upset the gold fish globe, and the Washingtonian turtle shut its shell

on the foot of the white rat. And all together and in their individual capacity they shook up the Smyrna rugs and the mission furnierybody had a fine time.

### OKLAHOMA WOLF CHASE.

Bare Hand Catchers to Hold Big Ronndup Near Chattanoogs.

Those who enjoy the chase will have a chance to exert their energy Thanksgiving day in the "big" pasture, says a Lawton (Okla.) correspondent of the St. Louis Globe-Democrat. The roundup will be made close to the town site of Chattanooga, where the slaying of the wolves will take place. Although no extensive advertisement has been made, vet it is expected by those in charge that the hunt will surpass in every particular the hunts of the previous two years.

Now that the trains run daily to that point, it will be very easily reached by rail, and it is the intention to have excursions run on that day, extending from Wichita, Kan., on the north to Dallas and Fort Worth, Tex., on the south. Many of the best dogs of the new state and adjoining states will be at Chattanooga and assist in the

mighty battle with the wolves. No guns will be permitted at any stage of the game, and the covotes can only be killed or taken alive by the dogs, lariat rope or the bare hands. Some of the best wolf catchers and hunters in the territory have been extended an invitation to attend, and it is likely that most of them will accept the invitation.

Pumpkins na Sweet as Sugar Beets. The Iowa experiment station at Webster City is doing some original work in breeding pumpkins in order to raise their sugar contents, says a Webster City correspondent of the St. Paul Pioneer Press. Professor A. S. Beech of the Korticultural department has selected ninety pumpkins of the different varieties, has planted them and upon their attaining maturity has submitted samples of each to Professor L. G. Michael, chemist of the station. who analyzed them. He found that their sugar contents varied from almost nothing to as high as 4 per cent. This highest grade is one-third as much as the average amount found in sugar beets. Another interesting fact disclosed was that for weight pumpkins have less solid matter than milk. This great variation in saccharin substances opens up a new field for breeding investigations. The object now is to pick the seed from the varieties giving the best chemical analysis and to breed crosses of the different varieties.

But Henry Apparently Did. A small Woodbury (Conn.) boy told his mother recently that he had found out his sister's beau's name, says a special dispatch from Winsted, Conn., to the New York World. The boy says it is "Henry Dont," he is sure, for be heard his sister say "Henry Dont" more than a dozen times the evening

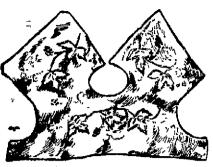

Tribute to an Exposition. Opie Read, the novelist and lecturer, has this to say about the Jamestown exposition: "At all previous expositions we have stood in the workshops, but at Jamestown we step into the library." Mr. Read will spend much time at the big celebration next year.

### ARMOR PLATED AUTO.

Millionaire's Novel Machine Built to Withstand Ramming of Trucks.

leather dealer of New York, has had constructed for himself an armored automobile at a cost of \$10,000, which is the first vehicle of its kind built for HOW HOTEL GUESTS ARE FLEEOED private use, so far as known, in any city in the world, says the New York World. A half inch plate of chilled steel protects the rear and side panels of the car from the axles up to within three feet of the hood. The sides of the seat of the chauffeur are similarly safeguarded, so that all parts of the car—that is to say, what would be the vital parts in a warship-are proof against ramming.

trucks or wagons.

Jacob Stolfs with a woodchuck, Ed- is applied should be of a coarser and figured. He has been noted for his care and consideration for the rights of others when automobiling, but has not always received the same consideration himself, and has had two or three narrow escapes from injury by recklessly driven trucks The danger from collision was brought strongly Fred Gibbs tailed the procession with the work would be thus drawn out of to his mind last February, when he and Mrs. Ladew were nearly plunged into the East river through the gates right side of the material, begin the of the Astoria ferry house in New York.

The machine is beautiful in design and ornamentation and exactly what the owner wanted. The vehicle complete weighs a little more than two and a half tons and is probably the heavjest automobile of its size in the world. The steel plate in the rear and on the sides is covered with a highly polished veneer of malachite green.

So far as outward appearance goes, the vehicle does not differ from the ordinary cab auto except in the elegance of its finish. It is equipped with an air brake, an entirely new device. and in addition to this is another and most ingenious scheme for the guidance of the chauffeur. Directly in front of him is a brass cylinder, the circumference of which is divided off into sections, each containing a direction, like "Go slow," "Turn right,"
"Turn left," "Stop," "Proceed," All these are controlled by a button within the cab and are directed by the occupant. As an additional precaution there is a megaphone speaking tube which, in addition to the signaling, can ed as to the wishes of his passengers fect it is lighted by electricity.

### HARVARD'S NEW GAME.

Dr. Dudley Sargent, director of the Hemenway gymnasium at Harvard university, has invented a new game very much like basketball, and he will soon begin some experimental games

with it, says a Cambridge (Mass.) dispatch to the New York Sun The teams to play the game will consist of tweive or sixteen men, preferably sixteen, and play will be held on a field a hundred feet square.

There are to be four goals, one on each side of the square, the two opposite ones to be detended by the same team. The field is marked off with a twenty-five foot square in each corner and a fifty foot square in the middle The remaining four spaces in front of the goals, 25 by 50 feet, are to be occupied by two goal tenders and two oppo nents. In the center square there are each corner square one man from each team. The players are not allowed to leave their assigned spaces. The rules of the game are very much like basket ball, except that the kinds of goals and methods of scoring are entirely differ ent. Dr. Sargent hopes to get up a game of much more interest, excitement and variety than basketball.

### Railrond's Encalyptus Grove.

The Santa Fe has begun planting trees on its land in San Diego county southern California. The tract is 8,650 acres in extent and is known as the Arrange the table for the wooden Rancho San Diegito. It is near Del Mar. It will be converted into a cucalyptus grove, says the Railroad Gaplanted for a number of years. The wood will be used for ties and piles.

Use wooden plates for each course, and class of work, estimates that \$3,000 worth of timber for ties can be raised nia nestled in the coil of her glossy on one acre The red gum will be hair. But the climax of decoration planted, as this as well as the sugar and iron bark varieties of eucalyptus has been shown by experiments in to get rich fast. It costs 5 cents Unit-Australia to last more than twenty- of States and 7 cents Cuban to ride, on top of it, dressed as bride and five years underground, while the blue and you pay in either kind of money, gum will not last more than three as you like. But in the exchanges years underground. The seeding will United States money is worth only be done during the winter, and the \$1.12 Cuban, so the enterprising conseedlings for the first year's planting | ductor who runs his own exchange nets are now in preparation. About 3,000 a profit of 28 cents on the dollar. boxes of small seedlings are required.

Chinese Governors to Study In Japan The minister of the board of education in China has memorialized the in a biscuit. He has also advised of clouds with silver linings, but here, their majestles to send all the present western learning, and, on their return official position shall be allotted to the governors and academicians were recently sent to Japan.

### LIFE'S PHASES IN HAVANA

1. Harvey Ladew, the millionaire Things About the Cuban Capital That Jar Americans.

Experience of One Who Was Charged 60 Cents For Bolling Eggs Four Minutes-Charge Made Even For Seats on Park Benches-Fruitless In Land of Fenit

Havana, the metropolis of Cuba, has

one great qualification for a success-

ful winter resort-the conscienceless The French and German armies have ability of its hotel keepers to charge. what are known as war automobiles, says a special liavana correspondent buttressed with steel plates to resist of the New York Times. Not even a shot and shell. Mr. Ladew's auto car Venetian jeweler or a Chinese curio has not been built to defy bullets, but vender can come up to these Havana to turn aside the shafts or poles of hotel men. They begin with the little pat of execrable butter that you don't The novel and original idea of an order, but must have, and continue automobile protected by a plate of with not only everything you have orarmor is Mr. Ladew's own and was dered, but half a dozen more that you suggested by an accident in which he haven't. It is worse than the English system, where the price is fixed on admission within the four walls of the building and everything else is extra The other day a guest at a leading hotel ordered boiled eggs for breakfast. The bill of fare quoted a price of 40 cents, and the waiter explained that that was for boiling the eggs three minutes. The guest ordered them boiled four minutes. When the bill came it was for "eggs especiale," and the price was 60 cents.

There will be a charge for breathing in Havana pretty soon. Already there is a price fixed on the occupation of a bench in the parks and a horde of eagle eyed collectors ready to swoop down instantly on the unfortunate and weary wretch who happens to drop in-

to a seat for a moment. Havana is a beast of a place. There is nothing to smoke there but Havana eigars. When you want a first class mouth filling smoke of good old United States cut plug you can't get it to save your life unless some friend in the navy comes to your rescue with a box from a ship's canteen. I know a man who had been sucking Havana cigars for a week trying to get something in the smoke line that would give him a bite when a friend gave him a tin of cut plug. He just cuddled up to his old shiny brier for the rest of that day and was unutterably happy.

Down in Empredado street Mr. Quong Yuen runs the celebrated "Hoosier laundry," as a large sign across two windows proudly proclaims.

Freight from Key West to Havanaabout fifty miles—is 40 cents a pound. Here is the proof. In Key West grapes are 10 cents a pound. In Havana they are 50 cents a pound.

A New Yorker sat down in the swell Dr. Sargent's Invention Consists of but could get nothing that suited. Then he called for the bill. It was \$5.30. He looked at it a minute and then paid it. "Say," he said as the waiter brought him the change from a ten dollar bill, "is there any place in this town where I can get something to eat? I'm hungry"

A nice looking young man came down to Havana from New York recently to observe the progress of intervention. In his home town he had been accustomed to having plenty of fruit for breakfast, and be telicitated himself upon his arrival in the land of fruits and flowers, thinking of the choice new varieties of fruits on which he would feast in Havana. The first morning he looked over the list. "Oranges, bananas, preserved guavas, guava jelly and guava paste." That was the line. Written on the bill under the heading of "Special" he found the word "apples." "Bring me a dozen apples," he ordered.

The waiter went away and in the course of a quarter of an hour returned with a plate containing a dozen scrawny little bee stung, second class cider apples and the bill. It was for

Then the man went out and cabled for more money.

A stunning girl got into a street car bound for Camp Columbia the other morning, going out to take a look at the American soldiers with a party that looked like a family reunion. She had the red ripe lips, dark eyes and olive check the Spanish novel writers zette About 700 acres a year will be love to rave about on page after page; also she way gowned to fit, and ber fingers glittered with flashing gems. There were diamonds in her ears and pearls on her neck, and a sweet gardewas the broad gold band in her nose. Hayana street car conductors ought

The Havana cabman is a monument of genius and intelligence. You summon him by doubling up your fist and waving at him as if you meant to break his face. When he comes you say "Palacio"-that's the only place she was so far from a money order sell- provinces to study law in Japan for any man ever wants to go nowadays. He looks perfectly blank. You vary the accent and repeat. Still blank. Then you shout, trying to alter the pronunciation. Still blank gaze. Finally you get thoroughly angry, hop up official academicians to Japan to study and down, threaten to call the police and keep shouting, "Palacio!" Palacio!" A white light begins to dawn upon his them. Their majesties have already darkened brain. "Palacio" he says like any other parrot, "Si, sener, Palaclo." Great people, these Cuban cab-

### RECORD SHIP GUNNERY.

Maine Makes Twenty-nine Hits Out of Thirty-nine Shots at Target.

Twenty-nine hits out of thirty-nine shots at a range of 4,000 yards, more than two miles, with five six-inch broadside guns is the record recently made by the gunners of Rear Admiral Robley D. Evans' battleship Maine, which arrived at the navy yard in Brooklyn the other day. According to the best information obtainable, this is a world's record for naval gunners under the conditions experienced, says the New York Tribune.

The target practice took place off Barnstable, Mass, at the south end of Cape Cod. Forty shots were called for by the navy regulations, but when the thirty-ninth had been fired the gun pointer reported that there was no bullseye left to shoot at. The practice was new to the gunners of the United States navy. It is known as broadside firing, all the guns on one side of the ship being fired on signal at a target placed not less than 4,000 yards away.

The first broadside of five shots went wide. The second broadside took from twenty to twenty-five seconds to fire; then as the range was found the guns were loaded and fired faster and faster until eight broadsides were fired in 160 seconds, and 'as twenty-nine of the shots were hits and the target was sixty feet long and thirty feet high this means that if the target had been a ship she would probably have been put out of commission and sunk in that space of time. Ensign L. R. Leahy was the officer in control of the firing on this occasion.

A world's record with the Maine's twelve inch after turret guns was established for night shooting by Midshipman Bryan McCandless and his guns' ciew. Out of twelve shots fired while the rays of a searchlight played on a small target (17 by 21 feet) placed 4.000 yards away they made six hits. Lieutenant Roger Williams at the forward turret guns also made a record of cleven hits out of sixteen shots. The Missouri's men made eleven out of fifteen shots, but the Maine's gunners fired one shot more than called for at the range. With the three inch guns at the same sized target and at 2,000 yards range while the ship steamed at 10 knots Midshipman Drake and his guns' crews made a high percentage in the forty shots fired, each gun pointer firing ten shots.

### FRUIT HEDGES.

Agricultural Department's Scheme to Grow Them In America.

According to an official of the department of agriculture, fruit bearing hedges are among the latest novelties for introduction into the United States. says a Washington dispatch to the St.

Louis Republic. The plant in question is imported from South Africa, where it is known cafe at Havana the other morning for as the amatungula. Its flower is white, breakfast. He tried several dishes, and the fruit, a red one, is perfectly edible. The shrub, a thrifty evergreen, makes the finest kind of bedge. The plant's botanical name is given as Ca-

> rissa grandiflora In Natal, whence the queer plant is obtained, the fruit is one of the most popular varieties found in the market. It is about the diameter of a large damson plum, but has an elongated form and a distinct point. Europeans in South Africa recommend the fruit

of the hedge for use in salads. In bloom the hedge of the amatungula is described as a beautiful sight. the white, jasmine-like flowers being in marked contrast to the dark green foliage Later the conspicuous red of the fruit offers another pleasing sight. In order to raise the shrub it is necessary that the seeds be sown in a bed, and when the plants are six inches high they must be set in the place chosen for the bedge and about a foot apart in alternate rows. The more they are trimmed the more they inter-

weave their branches, which are tough and thorny. A related species, with pendeut, edlble fruit, resembling barberries in shape, is grown in the municipal garden in Cape Town. It is recommended for ornamentation of lawns and parks

in the subtropical regions of America. Another plant from South Africa which it is hoped will find a place in the warmer sections of the United States is the Kaffir plum, a beautiful shade tree that grows so sturdily that strong winds cannot injure it. It produces a wood which botanists say is almost indistinguishable from mahogany. The trunk of the Kaffir plum is gray, and the foliage is very dark and green. The tree grows in the shape of a vase. Its bright red fruits are ornamental and prized by the native children, but are not valuable for the market. For shade trees in the frostless sections of the United States the agricultural department strongly recommends the cultivation of the Kaffir

Hen Squad a Government Experiment.

How to entice hens to lay more eggs is the interesting problem now absorbing the attention of the agricultural department, according to a Washington special dispatch to the St. Louis Globe-Democrat. The bureau of animal industry has employed Robert R. Slocum to have charge of this new work. Besides seventy-five as chipper white Plymouth Rocks as man ever laid eyes on, Mr. Slocum will have the assistance of a few well paid scientists. The hens are to be taken to Baltimore. First Mr. Slocum's pullets will be asked to demonstrate whether mash should be fed to them moist or dry. Then the department wants to know whether it is better to feed hens all they want-that is, by the hopper methodor just as much as a man thinks they should eat—that is, by the table d'hote method. Strict tab will be kept on the output of the fowls from the fact.

A Little Sound Advice Will Help Many a Sufferer in Massillon.

No woman can be healthy and well i the kidneys are sick. Poisons that pass off in the urine when the kidneys are well are retained in the body when the kidneys are sick. Kidneys and bladder get inflamed and swollen, erowding the delicate female organs nearby and some times displacing them. This is the true cause of many bearing down pails, lameness, backache, sideache, etc. Uric poisoning also causes headaches, dizzy pells, languor, nervousness and rheumatic pain.

When suffering so, try Doan's Kidn y Pills, the remedy that cures sick kid- and sometimes leads to them, and, neys. You will get better as the kidneys get better, and health will return when the kidneys are well. Let a Massil on woman tell you about Doan's Kidney

Mrs. S. Dreson, of 103 Canal street, Massillen, says: "In the summer of 1900, after being cured of pains through the back and hips which often extended towards my shoulders so that I could scarcely attend to my household duties was only too glad to make that fact known through our local papers and to state that the remedy which brought about this result was Doan's Kidney Pills. It is now more than four years since I stated these facts, and although I have had slight recurrences since then Doan's Kidney Pills have never failed to give me positive relief. I can just as strongly endorse the merits of this preparation now as I did when it first "How s

came to my notice."

For sale by all dealers. Price 50 cents Foster-Millburn Co , Buffalo, N. Y., sole agents for the United States.

Remember the name-Doan's and take no other.

Rapid Growing Fungus.

In "Recollections of a Happy Life" Miss North describes many of her young enthusiasms and among others that of collecting and painting English fungi. On one outing, she says, I came upon a fungus shout the size of a large urkey's egg. Eager to see it develop. I took it up carefully and carried it home. I put it under a tumbler on the window sill of my bedroom at night. At daylight I was awakened

by a horrible crash of splintering glass. Behold the tumbler had fallen to the floor and broken to bits. The fungus was standing five inches tall. What a relief it will be, when the having hatched itself free from its 13ing had raised the tumbler and tilted it sidewise until it fell over and to the floor. The fungus had a horrible smell, and soon a swarm of flies were hovering over it.

Amenities of the Table.

## MISS KENDAL'S FAN

She was rather a smart young woman. He thought himself an uncom-

Her fan was sadly broken. So this economical young woman spent the afternoon before a party, sitting with her back to the light to give her complexion every chance, mending the improvident fan with a weak solution of gum and water. Why weak solution? Well, she knew what she was about better than you would.

So she went with her estimable mamma, and she danced. She was personable-very-and she had a taking way with her when she ilked, and she had a cool head, which is better than rubles though she did not have to live by her wits, she frequently made them afford various little additions to her toilet, and that is no small matter to a smart

And presently, while she was sitting out, her partner took hold of that gulleless fan. In an instant it was broken. and her little cry of distress quite went to his heart. Being rather impecunious himself, young Schilling knew how difficult it is to raise the ready coin at every moment's notice.

"Doesn't half match your dress," he said as she examined it carefully, saying she must try if it could be mended. "Don't bother about it. I'll send you

"How awfully sweet! And it's just like you to think of matching my dress." Her tone was charming.

with a man whom she had met two or three times and knew vaguely as one knows quadrates of casual acquaint ances. But it was only that evening she had heard him described as very rich, and it made her thoughtful. This was the young man with body and estate. He thought her uncommonly

"How slippery these silks are!" she said as they finished supper. It was a sit down one and of remarkable virtue. "Do you think you could pick up my fan for me? It has dropped down at your side."

He pushed back his chair and stoop-"Oh, it's broken!" she cried, bending too. At that moment Mr. Gould lifted his

head. There was a slight collision. She blushed charmingly, and he held the fan awkwardly in his hand. The sticks were smashed across.

the other side of the table. He took in the situation, and he smiled an evil smile. She blushed deeply. The man of opulence stuttered. "Shall we go back into the dancing

I'm awfully sorry," said Mr. Gould for the second time when they were in the corridor.

plaintively. "Shall we turn into the library and cremate the relice? I can't bear the idea of its being thrown on the dust heap."

When they stood by the fire he offered it to her, but she shook her head, smiling this time. "No, that is too cruel. You did it, and you must burn the poor thing."

third time. "May-er-may I not send you another?"

"Oh, but this was of no value really. can get one myself."

She healtated, paused expressively, till, lifting her eyes to him, she mur-

dreamed of having silver brushes with the most elaborate monograms procurable, but the rich young man fatuously conversed with his old schoolfellow, the poor young man, who threw himself in his way. So they became rightcously indiguant together over the art-

"Let's send her one of those Japaling. "Come around to my rooms. We'll find one there and do it up, with our kind regards."

"All right," said young Gould, yawn-

So they made up the parcel together. But Schilling rather overdid his part, and Gould, at the last moment relenting, pulled his card out again while the other had his back turned hunting for scaling wax and kept his own counsel. After all, he was a gentleman at heart, which the other never was nor could

And the next day Gould sent her a lovely fan from the Burlington arcade, for he was ashamed of the way they had talked about her that night, and he avolded Schilling, whom he saw in

little note! And then he met her unexpectedly at church one Sunday. Three weeks later they were engaged to be mairied, and she had three sets of hairbrushes given her right off and did not like any of them.

like that. But she is very pleased; she did not want a clever man at all. She has wits enough for both any day. She will make a very good wife for a rich man, but young Schilling and she

would have swindled everybody and come to grief in the end.-New York

said the censorious friend. "Yes, I do," answered Senator Sorghum. But whenever I want anything done I can't get the other fellow at the armhole.

### THE WHOLESOME WOMAN

Some Plain Words on the Real Secret of Feminine Beauty.

If the woman of the twentieth century is going to give the greater part of her waking hours to unnecessary care of her body, she sinks to the level of the Indian squaws who were the pets of the great chiefs hundreds of rears ago. The squaws were olled and painted and overhung with sharks' teeth and wampum—they had rings on their fingers and bells on their toes. What real differences are there between those fine ladies of the Choctaws and the Iroquois and the fine ladies of today? And yet there echo in the ears of the modern woman the cry of the tenement house, the cry of the child laborer, the cry of all the pressing, unsolved problems of the home and of the world—the err of her own immortal soul-the while she dawdles over her silly face and grimaces before a mirror! The square was the nobler woman of the two. At least she "lived up to her lights."

The whole "beautification" enterprise is delusive. The woman who scrupulously regards neatness, who observes the laws of health, who does the duty of each day as though it might be her last and then gives her beat efforts to making her world better and happier, without much considering her own complexion—that woman is not only admirable for her character, but she is also likely to be far better looking than, her belaced, overdressed, powdered, rouged, "cerated," massaged and overmanipulated sister.-Kate Upson Clark in Levlie's Weekiy.

### TIGHT STOCKINGS.

Their Bad Effects Are Even Worse Than These of Tight Shoes.

The habit of wearing tiglit shoes is bad one, but werse even than narrow toes is the habit that many women. have of buying hose too small for their feet and wearing them constantly.

It is needless to say that binding flesh in tight stockings is one of the most harmful forms of lacing, because it restricts circulation, and when that is impaired the individual becomes a prey to all sorts of ailments.

Stockings too large, the other exreme, are also bad, but the fil effects they cause are not to be compared with the wearing of tight hose. When they are too long and wrinkle over the instep and under the arch of the foot, they cause callous places, and the folds of the material pressing into the flesh frequently irritate the skin, because of the constant friction of rubbing up and down with every step taken.

The ideal stockings have broad toes, so that the feet can lie straight in them. They should fit close to the fiesh, not enugly enough to be uncomfortable, but just shape, themselves nicely to the feet. Once such hosiery is put on, no other kind will ever be

purchased again. soft, and if possible get the types that have them on the outside of the foot instead of down the center, where if the threads are drawn a trifle tight, they often chafe the fiesh - New York American.

### THE HOME DOCTOR.

If choking, get down on all fours and

cough. After the use of a mustard poultice on any part of the body rub that part with camphorated oil to avoid the possibility of taking cold.

At the first intimation of a more throat try a gargle of one teaspoonful of salt and one of carbonate of soda to half a glass of water.

If stung or bitten by an insect, make a paste of starch powder with chloroform and eau de cologne and apply to the affected part at once.

Persons predisposed toward erysipelas should avoid wines, strong tea and coffee and highly spleed or seasoned foods. The more laxative and cooling the diet the better.

When the youngsters burn their fin gers, apply oil of peppermint. It is a wonderful remedy. It the skin is bruised, this cannot be used. In case of that kind apply a solution of baking powder or borax.

To Wash Laces.

To wash laces, make a suds with naphtha soap and topid water, put the laces in it and let them soak for ball an hour, then souse them around and squeeze between the hands to get the water out. Make fresh suds, souse laces around again, but do not rub, lest rinse in two waters, with a few drops of dissolved gum arabic in the last water. If the lace is cream or ecru. add a few drops of orange dye to the last se many little fairles are kept busy in the water, or, if pure white, a few drops When nearly dry pull gently into shape and roll from one end, keeping edges even, then wrap in a damp, cloth and

The Neck of the Walst. . Here's a point about the neck. The seams should equal; in width that of one of the front portions of the blouse front of the neck. All told, the neck should be divided into exactly three equal parts, one for each side front and one for the back. A back that does not measure exactly the width of one side front is too narrow and the neck will neither fit properly nor comfortably. The shoulder same should always remain straight at the neckband. If it needs to be moved the alteration-must only be made more toward the back or toward the front

a not too hot iron.

enjoy. It has one advantage that should commend it to young and old alike; it may be made quite simple and easy to play or quite difficult if so desiredthat is to say, you may use a list of animals, such as we give here in illustration, or a list of phrases or sentences, the latter being of course the more difficult to "untwist."

being twisted, or "pied," as the printers say, with the letters arranged in complete disorder; it is much better to make a typewritten list, for ordinary handwriting would not be plain. enough:

Aimèosh. Grabed. Retirer. Duggop. Parti. Leap Then. Kacopec. Unnepig. Rugaja.

er, with a duplicate list of the numbers at the bottom of the sheet, and, having fixed a time limit, say, of half an hour, offer a prize to the player who first succeeds in writing the real names opposite to the numbers.

Here is the "untwisted" list: Cliamois. Puz doz. Terrier. Albatross. elephant. Peacock. Pengula. jaguar.

Anis on "Horseback."

A French traveler has discovered a new species of ant in Siam, or at least a new trait that he has never before seen recorded. The creatures were very small, of a gray color and lived in damp places. They traveled offen and in troops, which seemed to be under the direction of a commander, who rode on "horseback." M. Meissen, the Frenchman who noticed this peculiarity, was attracted to these groups by discovering that each company contain ed a large ant that traveled more rapidly than the others. Observing them more closely, he noted that each large ant always carried a small gray ant upon its back, though the remainder of the troop were on foot. This mounted ant would ride out from the line, travel swiftly along the column from head to rear and apparently overlook their maneuvers. M. Meissen concluded from what he saw that this species of ant, while on its travels is under the direction of a commander, though such "ant horses" as the general rides must be rare and valuable, for he scarcely ever found more than one mounted ant n a colony.—Philadelphia Ledger.

Left Handed Animals. It may seem queer to speak of an animal or a bird as left handed, but the naturalists use that term in discussing tue, question, just as they do in speaking of human beings. Many of them claim that all animals and other candidate, Miss Whitehead, the The seams are, of course, small and birds are left builded. Livingston, the next rainy Saturday night. famous African explorer was these. One of his illustrations is the habit of the lion in always striking with its left paw. Parrots are probably left handed, too, for they nearly in perfect taste. Indeed, he would nevalways take with the left claw anything that may be handed to them. A student of parrot habits says, however, down and began to chat with ber, all that this may be accounted for by the fact that people use the right hand in giving anything to a parrot, and the bird naturally extends the claw that is and having an analytical eye, he disnearer the object.

## A Practical Wooer

Henry Truesdale was a practical

young man, a member of the best social circle and in every way fitted to get on. He was economical, but not niggardly. In his business he was very systematic and had a remarkable knack of saving labor, which is the result of system, though some people have a special gift in getting things done with the least trouble. Truesdale sat at his desk at the head of his department idly twirling a pencil, and yet his predecessor had never had time enough to do his work. Moreover, it was admit ted that Truesdale was the better man ager of the two

Mr. Truesdale went into matrimony In the same practical fashion as he administered his department. He regarded every girl in his circle as he would regard so many applicants for a position of confidential typewriter and stenographer. He examined the credentials and qualifications of all and sifted the applicants down to two, Martha Haynes and Gwendolen Whitehead. Neither possessed means in her own right, but Mr. Truesdale had none himself and was too good a business man to propose a partnership to capital without capital himself.

Having thus selected the most promising candidates, he proceeded to carry his attentions into the homes of both in order to observe them without the limelight of society. One rainy Saturday night-called tub night before the day of modern plumbing he resolved to begin operations by visiting Miss Haynes. "I shall be likely to take her off her guard and can the better

judge of her," he said. Now, it happened that it being Satur-Now, it happened that it being Saturday night, and rainy at that, Miss Haynes, who was her father's house-keeper, concluded to examine for herself the range on which the cook had recently been spoiling dinners. The servant had gone out, and Miss Haynes removed the ashes, including clinkers, not neglecting the chimner, which was choked with soot. While she was thus engaged the doorbell rang, and as Miss Haynes was the only person in the house she was obliged to answer the house she was obliged to answer the content of colock, P. M., at the premiser, 3 at one o'clock, P. M., at the premises, at that one half miles east of the clock, at one half miles east of the off miles north of sippo in said Stark County, the following described real stark County, the following described residents of the village of North Lawrence, and one they miles east to the village of North Lawrence, and one they miles east to the village of North Lawrence, and one they miles east to the village of North Lawrence, and one they miles east to the village of North Lawrence, and one they miles east to the village of North Lawrence, and one they miles east to the village of North Lawrence, and one of the village of North Lawrence, and one they miles east the premises, attuate on an ore half miles east the county of the village of North Lawrence, and one they miles east the premises, attuate on an ore half miles east the county of the village of North Lawrence, and one they miles east the county of the village of North Lawrence, and one half miles east the premises, attuate on earl of the village of North Lawrence, and one half miles east the premises, attuate on earl of the village of North Lawrence, and one half miles east the premises, attuate on earl of the village of North Lawrence, and one half miles north of the hold of the order that the County of Stark County, the following described east to be section the village of North Lawrence, and one half miles north of the hold of the north village of North Lawrence, and one the village of North day night, and rainy at that, Miss house she was obliged to answer the bell. When she saw Mr. Truesdale in evening dress she stood up under the trying ordeal as best she could, invited him in, excused herself while she made a hasty toilet, then came down and foliod him in the drawing room. The result, while it was not what

might be expected from a severely practical man, was in perfect accord with Mr. Truesdale's bent. Miss Haynes in taking upon herself to do what the servant could not do showed oneigh, but it seemed to Mr. Truesdale that there must be a lack of system lu a house where such a surprise could happen. However, he passed a very pleasant evening and went home resolving to make a similar visit to the He found Miss Whitchead sitting

He sat the while wondering at the harmony of the different articles of her costume. the dainty appearance of the room. dovered that there was not a costly thing in either. The pictures on the walls were works of art, but not expensive; the furniture was the same, and as to the lady's dress it was an attractive combination of scraps. to discover this.

"I'm getting awfully down on the messenger service," said Mr. Truesdale, "I had an invitation to dine with a friend tonight, and, having made up my mind that I wished to spend the evening with you, I declined. I sent a reply by messenger and, though the distance was not over half a mile, the charge was 40 cents."

"A note' with a special delivery stamp would only have cost you'12." "Singular." observed Mr. Truesdale. 'I never thought of that."

"We girls whose fathers haven't fortunes and who must keep up our positions in society are obliged to think of such things, Mr. Triesdale. We can't bely ourselves. Mamma-has no head for economy, and I am obliged to think for myself or give up society." The next time I send a note to a

girl I will-use your plan. But I couldn't very well send a note with a delivery atamp on it to a girl, could I?" --

"It would smack too much of economy in a society man. But I'll give you a way of employing a little more capital and making a bargain at the same time; Add 10 cents to the 40 cents, step around to a florist, buy 50 cents' worth of violets, and the florist will send them with your note right up to the girl. You will have your note sent for nothing and make the girl bappy with the violets."

Mr. Truesdale sat looking at the proposer of this beautiful financial transaction with mingled surprise and admiration. But he was accustomed to restrain his approval of the acts or suggestions of his subordinates in busi ness for feat they would expect an in crease of salary, and from force of habit he made no comment on Miss Whitehead's plan. Soon after he left her. The next morning she received a written proposition of marriage, accompanied by a whole cushion of vio-

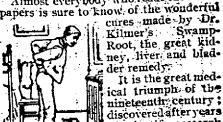

lets.: The proposal was declined on the ground that she was engaged to young Enderby, who had recently come into a fortune.

Mr. Truesdale has not yet married. He says it is harder to get a good wife than it is to get a good stenographer. CHARLOTTE SHERWOOD

DO YOU GET UP

ideas regarding military balloons have been developed by French military SANTA FE TRAIL SIGN men. No other nationality has been able to keep pace with them. For this reason Lieutenant Lahm's recent victory abroad created all the more interst and surprise, as indicative of the progress being made by American army officers. The mastery of the art of navigating the air in balloons has been attained more by the individual effort of the officers themselves than by any excess of governmental encouragement. Now, however, the war department has contracted for this complete modern military balloon, with a capacity of 7,750 cubic feet of gas and all ap purtenances, so as ic afford energetic officers ample opportunity for pursuing their investigations under the most favorable and up to date conditions. Both Major Reber and Captain Chandler volunteered for the experiment recently made at Pittsfield, and from this evidence of their interest it is expected that they will pursue their investigations with even greater enthusiasm when the government comes into possession of the great airship now building in France.

The French balloon in which the more important American experiments will be made in the coming year has an envelope of eight-weight silk, varnished and covered with a radio sa liare preparation to preserve the silk. This is believed to provide the best combination so far discovered for insuring durability and lightness of weight. There is a possibility that the American army officers will make a further test, though, with one of the old captive balloons now owned by the gorernment, of an invention brought to their notice some time since for precautionary use in war. This is the somewhat remarkable idea of attaching to the balloon at the point of greatest circumference, on a line parallel to the car, a broad aluminium band which in case of accident, through leakage of gas, would convert the envelope into a parachute and insure the safe landing of the aeronauts. Al these recent scientific suggestions will receive consideration at the hands of the army signal corps, and it is confidently expected that the victory of Lieutenant Lahm abroad and the experimental yoyage of Major Reber and Captain Chandler will be but the fore runners of aerial demonstrations which will give America high rank in international aeronautics.

### DEVOTION OF JAPANESE.

Natives Rise to Give Their Children Sents In Street Cars.

President Roosevelt had a conference recently with Merriam Colbert Harris, missionary bishop of the Methodist Episcopal church for Japan and Korea regarding the situation in Japan growing out of the discrimination by the authorities of San Francisco against Japanese school children, says a Washington special to the New York World. "I have been in Japan thirty-three rears," said the bishop, "and can say that the Japanese entertain feelings of profound friendship, gratitude and respect for this country. No attention should be paid to stories that the Japanese are conspiring against American interests. Japanese are unusually sensitive about children. In Japan everyoody conspires to make the life of a child a happy one. So much respect is shown for the little ones that grown people get up from their scats in street cars and give them to the children up to a certain age. This accounts for the grief the Japanese have felt when they learned that Japanese children in Sav Francisco have been discriminated against. They cannot understand it. in view of the fact that Italian children, Irish children, German children: and all nationalities are received in the unblic schools on an equality."

New Satety Scaffold.

What care is taken nowadays to prevent accidents to workingmen is illustrated by the latest thing in scatfolds that swings from the front of a building in the course of construction opposite City Hall park in New York. The scaffold is swung from steel arms fastened up near the future roof of the building by steel cables, and the boards on which the bricklayers stand are laid on another set of steel supports to which the cables are reeved, says the York Press. But the best thing of all about this scaffold is that it is not holsted or lowered in the old way by the men hauling on the cables. This operation is done by means of winches, of which there are two to each supporting beam of steel. The lowering and raising of the scattold is slower than under the old way, but the gain in the matter of security of the men at work on it is considered well worth this elight drawbáck.

First Bowlder to Mark the Historic Highway.

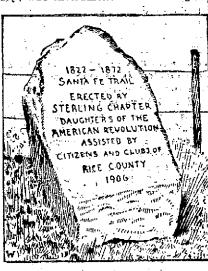

TT WEIGHS ABOUT 5,000 POUNDS.

The Huge Stone Placed Between Sterling and Lyons, Kan., Was Brought From Western Oklahoma Freight Free by the Santa Fe Railroad-Traces of Old Road Are Fast Disappearing.

The first bowlder to mark the Santa

Fe trail has been placed in position on the main road between Sterling, Kau., and Lyons, Kan., a mile from Lyons, says a Sterling correspondent of the Kansas City Star. It is a bowlder weighing about 5,000 pounds. .1t was found in western Oklahoma and was brought to Sterling freight free by the Santa Fe railway. While other markers are being purchased with money contributed by the school children of the state of Kansas, this one is paid for by the people of Rice county. The legislature has appropriated \$1,000 to mark the trail, but no application was made for a part of it. The Daughters of the Revolution,

seventeen women; started the move ment, and Mrs. W. C. Smyser, secretary, was instrumental in securing the

FIRST BOWLDER ON THE SANTA FE TRAIL. funds. The clubs of Rice county, the county commissioners and the schools united in the contributions. The man who drove the stake for putting in the cement foundation for the bowlder. Daniel Bell, was the first man married in Rice county. That ceremony took place on the trail itself.

The work of marking the trail is being taken up with interest by the conmunitles through which the almost obliterated roadway passes, but counties removed from the course are indifferent. The legislative appropriation is far too small to place markers that will not be moved or destroyed. In Rice county the location of the first marker may become the center of a small park. In Herington, Dickinson county, the trail course is directly through the yard of the principal public school. It is planued there to place a bowlder in the schoolyard, that it may be a lesson to the children on the ploneer history of the state.

For many years the trail was clearly identified wherever it led through the not observed southwest, but with the coming of the steam plows and the planting of the prairies to grain this is fast passing grand jury is in session, and that beer away, and the same disputes that are is sold at these races, in violation of known in the eastern part of the state the law. will make the exact location indefinite soon. ### "THE SPIRIT OF PATTISON"

Candidate Hoskins "Walks Hand-In-Hand With" It in Name, Not Reality.

Candidate Hoskins is the Democratic nominee who rushed into print to tell the world that he was better than his brother candidates on the licket, better than the state convention which had voted down his views two to one, and better than his party which has always refused to support the local option idea he now favors. This profession of superiority and loud proclamation of "walking hand in-hand, with the spirit of Pattison," are the gist and essence of his entire campaign and of his elaborate speech

as, printed in the Democratic papers. Mr. Hoskins, by his very assumption of being so much better than anybody else, challenges and invites the facts of his record, not in state affairs, for he has no such record, but in such local duties as he has been called to perform. For several years he has been prosecuting attorney of Auglaize county and is now. The temperance people of that county say that he has failed in his duty of enforcing temperance laws, the very bnes about which he makes his londest protestations for support. Even those who are not temperance men have little use for such a combination of false pretenses, contradicted by his own of-

Important, in fact convincing, information in this respect was pubished some days before Mr. Hoskins made his first formal speech of the campaign. Neither then, in his public address, nor in any papers supporting ( bim, has there been an attempt to answer the accusation convicting him of failure to do his plain; duty. Here are in Mr. Hoskins' home town by Mr. R. H. Stevenson of Columbus, the staff political writer of the Cincinnati Commercial Tribune: :

"Wapakoneta, O., Oct. 18.—Open violation of the laws of the state designed to enforce the observance of the American Sabbath; open violation of the state's laws against gambling: open violation of the state's laws for the regulation of the liquor traffic; these are to be found everywhere in Augiaize county whose prosecuting attorney S. A. Hoskins is.

"Mr. Hoskins is the Democratic nomined for secretary of state. He declared in his speech of acceptance that he will march through the state hand in hand with the spirit of John M. Pattison.' He declared in a letter to a Delaware minister that he is in favor of county option and all the other temperance and moral reforms for which the dead Pattison stood. These statements have led to a serutiny of the record of the man along these lines. A visit made by the Commercial Tribune's staff political writer to this county disclosed to him:

-"That slot machines and other forms of gambling are running in this and other towns of the county, in shocking defiance of the law.

"That saloons remain open on Sundays in all parts of the county. "That the hours fixed by city coun-

cils for the closing of the saloons are

"That horse races are beld on the Sabbath day, during the time the

"That the county grand jury, over which Mr. Hoskins as prosecuting attorney has charge, adjourned for the

"That privileges for this gambling were sold to the gamblers by the secretary of the county fair board, That the secretary of the county

fair board is also the chairman of the Democratic county committee which is conducting Mr. Hoskins' campaign in the county.

"That beer-called 'tonic'-was sold on the fair grounds during the fair,

"That the saloons which kept their front doors closed up until the time Hoskins was nominated in the city Experienced servents, the professor of Wapakoneta, now let them swing

"That the slot machines which now poor and the rich, were not permitted | The population has increased twice to be operated until after Mr. Hoskins

"Gamblers; when they buy a gam-He thinks invention might solve the bling privilege for any event, must be problem. "The genius who shall in guaranteed protection. It is not vent an automatic dishwasher and pot known what protection was given to scrubber will be a true benefactor of the men who operated the games of chance at the fair grounds. The privileges were let by A. E. Shaffer, who besides being secretary of the county "Infant prodigies are no better than board of agriculture, is chairman of Idiots," declared Professor F. Edy, of the Democratic county committee and the chair of nervous diseases at Drake in charge of Hoskins' campaign in his university before the lowa Mothers' home county. Possibly Mr. Shaffer told the gamblers that Mr. Hoskins, the prosecuting attorney, would be following in the footsfeps of Pattison and could therefore not see them, dren were prodigies and who didn't since Mf. Pattison's habits never ledhim into a bunch of gamblers."

Roosevelt's own repeated statement than the long haired, sensuous man is that he wants Republicans elected everywhere, because he is a Repub-"Music and art are fine things when lican and Republicanism is vital to the welfare of the country. ### THE PRESIDENT'S VISIT TO PANAMA

Features of Programme Prepared For His Trip.

CANAL ROUTE TO BE INSPECTED

at Mackintosh and Rubber Boots, Mr. Roosevelt Will Explore Famous Culchen Cut-To Be Entertained by President of Panama-Pirst Time That Chief American Executive Will Set Foot on Foreign Soil.

President Roosevelt's visit to the isthmus of Panama will present several novel features, says a Washington special dispatch to the New York World. For the first time in history the president of the United States will set foot on foreign soil and be the guest of a foreign ruler at dinuer. At the time of his visit to New Orleans President Roosevelt was technically outside the jurisdiction of the United States, as the vessel conveying him to the Queen City went outside the three Many interesting incidents will mark

the visit, ranging from a reception in honor of President Roosevelt at the palace of the president of Panama to ride on the Chagres river on a casco, the native water craft, and plowing through the sticky mud of Culebra cut in rubber boots and a mackintosh. President Roosevelt has had many unusual experiences, but his trip to Panama will furnish him with several new Mr. Roosevelt will spend only four

days in Panama, but they will be some of them as carefully collected busy ones. His only opportunity to rest will be on Sunday. Nov. 18, the last day of his stay. The three precceding days are to be crowded with sightseeing excursions and social functions. The president will make two speeches, one at the fiesta; then he will respond to an address of welcome by President Amador and later at a reception on pier 11 at Cristobal.

the magnificent battleship Louisiana. which will be convoyed by its sister ships the Tennessee and the Washington. He will be accompanied by Mrs. Roosevelt, Ethel Roosevelt, Dr. Rixey. surgeon general of the navy, the president's physician, and a secretary.

President Roosevelt will return from Oyster: Bat 'after election and will leave Washington Nov. 8. He will board the Dolphin at the Washington navy yard and will remain on board this ship until it reaches Wolf Trap light in the Chesapeake bay, where he will transfer to the Louisiana and start immediately for Colon. The distance from Wolf Trap light to Colon is 1.788 miles, and the voyage will take six days. The Louisiana will reach Colon Thursday morning, Nov. 15. President and Mrs. Amador, Chair-

man Shouts of the canal commission and Mrs. Shonts, who will leave for Panama so as to be there when Mr. Roosevelt arrives, and Chief Engineer and Mrs. Stevens will go aboard the battleship before President and Mrs. Infection. The headquarters of the Roosevelt go ashore.

party will be at the Hotel Tivoli, and Roosevelt go ashore. Immediately after landing the party

will be taken aboard a train and run slowly across the isthmus to La Boca, giving the president a casual view of germ, from stinging the president or the towns, the canal and a parade of the members of his party. the unlive school children. At La Boca there will be an inspection of the terminus of the old French canal and of the Paraina railroad. The entire plan of the canal will be explained to Utica, N. Y., will east his first belief President Roosevelt, and he will be given information regarding sites and plans for the proposed dam. lock and. lake at La Boca. There will be a trip In a launch to the islands of Perice, Naos and Flamenco, thus giving President Roosevelt a view of the actual deep water southern end of the canalithe approaches, the harbors of La Boca and Panama and the surrounding coun-

Luncheon will be served at Ancon. followed by a trip around Ancon bill mainder of the day will be given by President Received to the government of Panama, and, while the programme has not been finally arranged, enough of it has been prepared to show that It will be a busy day for the president. It will be a gala day, and the dirt is not expected to fly on this occasion: The city of Aucon will be decorated elaborately and illuminated brilliantly in honor of President Roosevelt.

Some time during the afternoon the executive party will be met by officials of the republic of Panama, and, conducted by them and escorted by a hundred young Panamans mounted, the president will drive about the city, The drive will end at a stand to be erected in one of the plazas, from which President Amador will deliver an address of welcome, to which President Roosevelt will respond. If there is time the presidential party will re-

riëw a parade. At night President Roosevelt will be entertained by Fresident Amador in the palace at dinner. After the dinner President and Mrs. Roosevelt and the other members of the American party will attend a reception and ball to be given by President Amador to President Roosevelt. They will remain a few minutes at the ball, which will follow the recoption, and will then return to their hotel, the Tivoli.

Friday merning, Nov. 16, President Roosevelt, accompanied by Chairman Shorts and Chief Engineer Stevens, will leave Ancon by special train for Culebra cut. Here he will be attired in rubber boots and a mackintosh, such garments being necessary in making an inspection of the cut. He will spend the entire day inspecting this famous section of the canal, which presents -8. E. Kiser in Chicago Record Months

the greatest difficulties in the war of digging the canal. He will inspect the hotel, the barracks, the machine shops, the railroad, the steam shovels and the other equipment used in the work and will watch the work of digging the dirt and loading it on the cars. and days

In the evening the party, will remin to Ancon, and early Saturday merning a special train will take the pigs ident to Gatun, where there is to a great dam. The president will inrestigate conditions at Gatua, lookios over the site of the dam and the locks. From Gatun the president will (go to Cristobal by train, steam though oc native "casco." Chairman Shonfa alid Chief Engineer Stevens, who will accompany the president, will explain the situation on the lower Chagres and the old French canal at that point. The party may also visit the old town at the mouth of the Chagres river. whence the party will go to Cristobai in a tug or a launch. During the afternoon an inspection, will be made of Cristobal, including the present and proposed terminals of the railroad and canal and of the hospitals of Colon.

Saturday evening, Nov. 17, there will be a reception and ball on pier 11 in Cristobal in honor of President and Mrs. Roosevelt, given by the employees of the isihmian canal commission. At this function the president will deliver an address. Sunday will be a quiet day for the president, and in the evening the party will board the Louisiana and start for San Juan, Porto Rico.

The ship will reach San Juan Nov. 22, and the president will remain there twenty-four hours. He will be entertained by Governor Winthrop. The president will employ all his tiple there in making himself familiar with the conditions existing in Uncle Sim's possession in the West Indies.

The party will leave San Juan Nov. 23, and the president, on the big battleship, will be conveyed to Wolf Trap light and transferred to the Dolphin. He will come up the Petomac river on this little craft; and reach Washington Nov. 27, in time to eat Thankegiving dinner at the White House.

President Roosevelt's trip will be made in regal style, as the battleship Louisians is the most magnificent of The president will go to Panama on the splendid modern fighting machines of the American navy A beautiful suit of rooms on the vessel will be prepared for the use of the president and Mrs. Roosevelt. The ship has been docked and overhauled notwithstanding that she is new and has been in commission only a few months.

Three of the most spacious cabins will be sitted up especially for the president and Mrs. Roosevelt, while another will be at the disposal of Rurgeon General Rixey. President Roose velt did not wish any expense incurred in fitting the Louisiana for the Panama trip, but the secretary of the navy decided that no expense should be spared in refreshing the decorative work of the cabins and making every provision for the comfort of the president and

Mrs. Roosevelt. Extreme precautions will be taken to protect the president and Mrs. Roosevelt from exposure to yellow fevel while in Panama. There have been no cases of yellow fever on the isthmus since last November, and there is little danker of it will be completely inclosed in this quito netting so as to prevent mosquitoes, which spread the yellow terer

To Stund on Chair to Vete Standing upon a chair or stepladder, Fred Ransome, the smallest voter in on Nov. 6 at the policin the Lightly ward, says a Utica special dispatch to the New York Herald He became twenty-one years of age Sept. 28 and has been duly registered. Ransotoe is a dwarf and is far too small of stature to reach the lever on the machine, which is above the head of the average man. He is only forty-one and one-half inches high and weighs but forty-seven

### IN FASHION'S REALM

SEPARATE LONG COATS INDISPENSA-BLE IN THE SMART WARDROBE.

A Black Brondeloth a Stylish and Practical Model For the Woman of Moderate Means-the Old Sawtooth Trimming Revived-Bood Effects.

Every well turnished wardrobe this teason must have at least one smart, perviceable long coat that can be worn equally well as a separate wrap for motoring, traveling and for ramy days. Another indispensable garment is the evening wrap, which, if wisely selected, will also do duty for many occasions of greater or less social importance

The black broudcloth cont with long, graceful, flowing lines from shoulder

CARRIAGE WRAP OF GRAY DROADCLOTH. to hem is a smart and practical model, especially for the woman of moderate means, to whom the possession of more than one separate wrap at a time is far from a reality. This woman buys a coat which not only serves as a smart accompaniment for her afternoon costume, but likewise is dressy enough for evening wear. And it is in the black garment that she finds these qualities best combined.

The skirt of the coat also forms a foundation for effective applications of braids and other trimming, the newest of which is witnessed in a ribbon trimming known to the older generation of women as sawtooth trimming Black satin ribbon three inches in width and edged with a narrow black silk guimpe described an effective trimming on a garment recently brought through the customs. Like the ma jority of the season's coats, the back was its newest and best feature, the trimming being applied in a circular movement suggesting cape lines.

Another one of its points which aroused some comment was the length. It could not be said that the garment was a three-quarters, and yet not a seven-eighths, but, rather, a betwixt and between, coming, as it did, but a couple of inches below the knees.

The hood and hood effect are other forms of coat trammings of the season, The former appears on the rain and tourists and auto coats for service as well as effect, with the latter in use on the evening models. Sometimes it

BACHELOR HABITS.

Wives Should Encourage Husbands to Spend an Occasional Evening Out.

There are not a few women in the world who have a rooted idea that then husbands should be as much a home fixture as the domestic cat, and this little mistake on their part is an active agent in the propagation of matrimonial woes.

Man is essentially a creature of change, and monotony is the death blow of many a one time fierce, burn ing passion. Consequently the wisc woman, knowing this, will encourage her husband to spend an occasional evening out, recognizing that her combetter appreciated it sandwiched in beone spent at the much margned but his home in Glen Cove, on Long Island, innocent club meeting

Early in married life a woman should recognize this fact and act accordingly. Instead of adopting an aggressive attitude when her husband suggests going out, she should smile sweetly, help him to get out and say. "I'm glad you're going out, dear Don't burry home." And when he does come invited to celebrate his horse show vicit should be to find a smiling wife and tory.

a good supper. This is the soit of marriage which is seldom a failure. The busband of such a wife is always in love with her and has a habit of mentally contrasting passed her with the other wives of his ac quaintance, much to her advantage.

There are many worse fellows than the one who seeks an occasional night out with his particular chums. Encourage him, little bride, and don't weep your bonnie eves out when he guests. takes you at your word. Never mind the example of your neighbor who has a husband of the first class hennecked order. You do not want monotony to it was transformed into a gold bedeckput the first touch of blight on your still warm, glowing affection, and this assuredly will happen if you do not restrain your passion for an unlimited dose of your husband's company.

Is a Woman Happier Married? Of course she is. Could there be any question among right thinking folk? In these days it is rather fashionable to deride marriage Even married people themselves occasionally scoff at the "holy state," and unmarried folk try to find advantages in single ble-sedness, independence, freedom, loss of anxiety and such delectable things. At the bottom of the hearts of most of us, however, we are quite certain that the married person is the happier being. and we indeed is the ultimate end of the woman who refuses to take upon herself the responsibilities of matrimony because she would be independent and free.

Not, of course, that one would advise any member of our sex, no matter how poor or old or friendless, to get married for the sake of home or companionship or any mundane reason like this. Marriage, if it is to be successful, must be dictated by true love and nothing else. At the same time there are women who funcy that they can do well without it. The troubles are end of time.

Poor sisters, they forget that there is something after all in the old saying about love making the world go round: they forget that the old maid, however fresh and up to date, must still live something of a stunted life. No! Again one says the woman is happier married, provided she choose rightly, and for choosing there is no better method than the old fashioned, perhaps somewhat forgotten, one of love

A Post Card Stand.

This handy little article is intended for standing on a writing table and te be used for holding post cards, or an a better one, is to make it a receptacle for those important letters that require not to be lorgotten and that are so easily forgotten unless they are kept

A USEFUL TRIFLE.

prominently in front of us. For the making of it use a piece of stout card board or thin wood about seven inches long by five wide. This is covered with cloth, and a cord is sewn all around the edge, and a piece of clastic sewn across the front in the position shows ters or cards can be slipped. The back is made in the same manner as an or the back of the stand.

Origin of Tonsts. The proposal of a health in an after dinner speech dates back to mediaeval times. At that time the loving cup was used at every banquet. It was filled to by the banners. ### FEAST TO HONOR PONIES

Prize Winning Steeds Guests at Clubman's Dinner.

**CELEBRATES HORSE SHOW VICTORY** 

Harvey S. Ladew, Millionaire New Yorker, Had His Equine Idols Led Around Festive Board In His Banquet Hall and Fed Sugar Plums Table In Form of Horseshoe.

Horses munched oats from silver buckets and drank from gold looped pany and that of his home will be pails at a "pony dinner" given by Harvey S. Ladew, the millionaire originattween a night with his old chums or or of new buck-and-wing dances, at the other night, says the New York American.

Two of the four footed winners in the Piping Rock horse show, where Mr. Ladew's entries won everything in sight, were given the stalls of honor at the dinner table alongside the forty guests of the millionaire, whom he had

Three other nags were led through the colonial dining ball of the splendid mansion by grooms in livery, and the guests fed them sugar plums as they

Welsh Princess, winner of 100 prizes in Great Britain, was the chief guest, and another little mare, All There, got more courtesies from the man for whom they had scored honors at Piping Rock than any of the human

The Ladew county seat is one of the most beautiful and costly on all Long Island, but to do honor to the horses ed harness shop to do honor to the equine pets which its moster says he prizes more than any other possession in the world.

The brilliant chandeliers which light ed the fete stretched downward in the form of traces, the bulbs were horses' eyes and the shades were blinders.

Ladew welcomed his guests in room designed to resemble a coach, and even the wine bottles took the form of whip sockets. And the human guests as they entered confessed that they had never witnessed such a novel spectacle before.

Even the mahogany table from which the guests were served was built in the form of a horseshoe, and the silver saltcellars represented feed boxes Special glass and silverware had been made for the occasion to represent evervihing "horsy," from hayracks to riding crops and stirrups.

The stalls built for Ladew's equine idols fronted the inner curve of the horseshoe table and the two prize winning ponies put forth their noses frequently into the very dishes of the guests and were retted by order of the

After the serving of the soup three other ponies were led into the room by grooms Each guest was compelled to caress them, then followed a moment not worth the pleasures which come in of darkness, and the electric lights its train, and they think they are hap- flashed up again to disclose the unipier unmarried and will be so to the formed grooms serving the champion ponies with courses of oats and yors" in golden frame collars.

Mr. Ladew was delighted with the success of his entertainment, and John Drake and Richard Carman agreed with Berry Wall that it beat a monkey dinner out of sight.

"CABBAGE PATCH" PARTIES.

Women Hold Them In New York to Aid Church Work.

"A cabbage patch party" is the latest idea of women's societies connected with church work as a means to raise money, says the New York World. Several such parties have been held in other way of utilizing it, and perhaps the Bronx recently, and each was voted "a great success"

> The latest one was under the aus pices of the Ladies' Aid society of the Woodlawn Methodist church. It was held by Mrs Lyman C. Pierce at her home, Glover avenue, Woodlawn Heights. The exterior of the house was decorated with huge heads of cabbage and lanterns. The interior of the house was likewise ornamented.

In the house the usual musical programmic was rendered and extracts from "Mrs. Wiggs of the Cabbage Patch" were read. Souvenirs wrapped in cabbage leaves were sold.

TO PARIS ON DONKEYS.

Spaniards' Novel Protest Against Excessive Auto Speeding.

Two well known residents of Madrid, in Spain, Senors Cruselles and Bueno, receptly arrived at Bordeaux in the sketch and under which the let from that city on their way to Paris, says a Bordeaux cable dispatch to the New York Sun. They are making the dinary photograph frame and can be trip on donkeys as a protest against hinged on by means of a piece of cloth the excessive speeding of automobiles, glued on to the top of the support and and they have named their asses after prominent automobile manufacturers.

They carry banners with the inscription, "Donkeys Are Better Than Automobiles." They have already narrowly escaped being run down by automo bilists, who were apparently incensed

Large Crop of Apples.

Calhoun county, the only one in Illlnois without a railroad, will raise more apples this year than any other county in the state, says a Bloomington dispatch. Its crop will exceed transported to market by boat. One grower raised 7,000 barrels from an per barrel delivered at the wharf.

PHONOGRAPH DINNERS.

"Canned Talk" Served on Napkin Rings at Chicago Banquets.

Did ou ever hear of a phonograph dinner? They're giving them in Chicago now with soup and fish and roasts served to the accompaniment of "canned" music and with phonographic toasts all bottled up in the form of napkin rings and laid by the side of the plates of the diners, says the Chicago News. It is only one of the many ingenious things done by ingenious Chicagoans with their talking machines, which in late years have come to serve many purposes, from storage maids crooning songs of Sleepyland to tired babes at night.

"Cold storage for hot air," is the way a young woman clerk described the phonograph dinner. Those who are on the dinner programme for a speech or he can do it. But, to his astonishment, song prepare it in advance by storing it away on a little wax cylinder made purposely to serve as a napkin ring and round condenser. The napkin rings are put on a phonograph at appropriate times, and the speeches come forth. After the dinner the diners exchange napkin rings, and thus each is enabled to take home for future reference anything heard at the table that strikes him as particularly bright or witty. There are two advantages to these toasts. They must be short, for the napkin ring will hold only a few minutes' talk and it is easier to deliver a speech by phonograph than orally before a roomful of critics.

"One thing little known about phopersons are able to recognize their to where it came from-the neck of own voices as reproduced by the machines. Others may recognize it readily, but not one person in a hundred knows how it seems to hear his own voice."

A club of women on the south side of tainment for its members. A dozen of the women caught the voices of their canaries on the wax records and on ? given afternoon assembled and ran all the records through a machine. Then there was a vote as to which canary should have the prize, a package of bird seed, for the sweetest song. Lat. of the bottle.-Exchange. er others of the women had their pet dogs bark and after trying these records separately set half a dozen machines going at once, making a tremendous racket.

TRIBUTE TO BLIND SON.

Magazine For Sightless Inspired by Mrs. Ziegler's Own Unfortunate.

The sympathy that moved Mrs. Willlam Ziegler, widow of the baking powder magnate of New York and Connecticut, promoter of arctic exploration, to plan a free magazine for the blind was primarily aroused by the misfortune of her own son by her first marriage, says a Wilkesbarre special dispatch to the New York World.

The son is C. C. Gamble of Luzerne borough, near Wilkesbarre, Pa., who has been blind since he was six weeks old. He is now about forty years old.

Mr. Gamble said the other night that a year ago, soon after he had told her what a boon it would be to the blind if garnered once a month. She then told him that she had resolved to put the plan into execution as soon as it could be properly developed. She recently informed him that she had made the arrangements for publication.

Mr. Gamble was educated in a New York institute for the blind at Ninth avenue and Thirty-fourth street. He went to Wilkesbarre in 1882 for treatment by a specialist and four years later was married at Wilkesbarre. He owns his own home, receives a comfortable allowance from his mother, is well read, happy and contented and the friend and adviser of many blind that is being ground.-Chicago News. people in this region.

Quinine by Mail.

British India's government, according to the New York Sun, is successfully making quinine, of which immense quantities are sold by it through the postoffices.

Nothing the Matter With Kansas. Papers had a lot to say, sneering-like,

Kansas: Welt it to 'em every day, chuckin' fun a Kansas, Air just full o' slander darts

From the busy eastern marts—
'Nun to break the people's hearts over there in Kansas. That's where fierce cyclones are born, er

the plains o' Kansas; Every word a word o' scorn fur the folks in Kansas

Hoppers darkening the sun, Dozens of 'em weigh a ton; Seem to think it's lots o' fun cracking

Now it comes their time to laugh, them felks out there in Kansas. Giving easterners the gaff 'bout affairs in Kansas.

Fields a-bulgin' out with wheat, Corn fur all the world to eat, Other crops that can't be beat over there in Kansas

Teams a-hauling out the stuff from the plains in Kansas: Railroads can't get cars enough fur to empty Kansas Ort to see the farmers grin,

Stroke the whiskers on their chin. As the cash comes rolling in over there in Kansas. Wemen singing songs o' glee 'bout old

fruitful Kansas, Babies crowing merrily everywhere in Kansas: Purty gals a-buying clothes, Togging out from head to toes-Style! You bet your life she goes over

there in Kansas. When the cares o' day are done, on the plains o' Kansas. And the kids begin to yawn, sleepy-like

in Kansas. Farmer wipes his glasses blurred, Reads a chapter of the word. Then kneels down and thanks the Lord that he lives in Kansas.

CORK AND BOTTLE.

An Odd Illustration of the Force o Compressed Air.

Here is a little experiment which wil interest and amuse our girls and boys. It is an experiment with air and is a curious one to onlookers:

Take a carafe or a large bottle with a fairly wide neck and, holding it horbatteries for business letters to nurse | izoutally, lay a cork inside the neck Then say to some friend, "I defy you to blow that cork inside the bottle so that it will stay there."

"Pooh!" he will cry. "That's easy enough!" And he will be cocksure that

THE CORK IN THE BOTTLE

he will find that no matter how hard the bottle.

"Well, I declare!" your astonished friend will ejaculate. "How do you explain that? Is the cork bewitched?"

The explanation is simple enough, after all. The bottle is full of air, of Chicago recently gave a unique enter- course, you understand. Well, when you blow your breath hard against the cork you cause a sudden compression of the air that is inside the bottle, and when you cease your blowing this compressed air immediately expands to its former volume, thus pushing the cork back in its original place in the neck

> THE GRINDSTONE. Why Water Is Used on It While

Sharpening Tools. We will try to make it clear to our

young readers how water helps the grinding of tools. If we draw a line on paper with a pencil the mark is composed of minute particles of graphite, which have been torn from the peint of the pencil by the roughness of the paper. If the paper were perfectly smooth no mark would be made. Now, if we hold a piece of iron against a grindstone we will mark the stone as we marked the paper, because the stone seizes the metal as the paper seizes the graphite. This will in a short time cover the stone with a thin band of iron, which will make grinding impossible, while the friction of iron on iron would produce destructive to read for themselves the news, even; then free to take on another "charge" of the metal.

It is not the function of the water to make the grinding smooth, for it is intended that the edge shall come from the stone rough. It is then made smooth with a hone, applied by hand, which is coarse or fine as the work for which the edge is required may demand. A great deal of grinding is done without water, and of the finest quality, too, but this is done not with grindstones, but with wheels made of emery or corundum, which have the property of throwing off the particles that have been torn from the article

The Feather.

A small fluffy feather, with very little stem, should be procured. The players form a close circle by putting their chairs together. One of the party starts the game by throwing thefeather into the air as high as possible. The object of the game is to keep it from touching any one, as the one it touches must pay a forfeit. This game can be made a source of vast amusement if played in a spirited manner.

A Few Facts About Clocks. In Brussels there is a clock which is wound by atmospheric expansion in-

duced by the heat of the sun. The first cuckoo clock was made in Switzerland by Franz Ketterer in the rally swings to and fro, especially if year 1735.

Petersborough cathedral, England, has the oldest running clock in the world. It was made by a monk in 1320 and is the only clock in existence that recently been patented by a Brooklyn is wound up over a wooden wheel,

Dolly Troubles. Now, Araminta, listen, dear. There is a doll next door, And, do you know, her mother is

A really stupid bore.

She came to see me just last week, When my poor doll was iil, My dearest little Eleanor; I'd given her a pill. And, do you know, my neighbor said

That Eleanor was plain. That if she looked like her Marie

Twould be the greatest gain. And I said, "Dear Miss Saily Jones. I would not have her look Like your Marie for all the world."

And then her leave she took. Now, don't you see, if she were wise She'd see my dolly's beauty-

I fear I spoke a little rude, But what is one to do? In such a case I scarcely think I am to blame, do you?

Oh, she is such a bore!

TURNS THE HAIR DARK.

Remarkable Effect of X Rays 🗪 Color of the Hair.

Heightened pigmentation of the hair is among the occasional effects of exposure of the Roentgen rays. At'a recent meeting of the Paris'Academy of Sciences Dr. A. Imbert and Dr. H. Marques reported certain observations bearing upon the matter. One of themselves having made frequent applications of the rays for a period of ten years noticed that the hair of his head and of his beard, previously almost completely white, had progressively become so pigmented that it was of a darker hue than it had been originally and the change had been observed by other persons.

In a subsequent instance these gentlemen had seen a similar effect. It was that of a man fifty-five years old who was under treatment with the rays for lupus of the cheek. At first 'he lost the hair near the ear of the affected side, but its place was taken by a pew growth of hair, and near the ear the new hairs were almost completely black. This blackness gradually shaded off as the distance from the ear increased, but the pigmentation was discernable even in parts far removed. Finally the corresponding half of the man's mustache became darker than the other half and without any previous falling out of the hairs.

Imbert and Marques add that in other cases they have observed a deèpening of the color of light hair under the influence of the Roentgen rays. They do not pretend to explain the mechanism of this action. It is to be presumed nographs," said an expert, discussing he puffs at that cork, the moment he that the effect is witnessed only in the new dinner feature, "is that few ceases to blow it will bob straight back hairy parts directly subjected to the radiation, but no specific information is given as to the circumstances of the application.-New York Medical Journal.

> AUDIBLE RAILWAY SIGNAL. New Electric System Promises to

Displace Semaphores. The Great Western railway, England, has successfully experimented with and just installed on a branch line a method of audible signaling as a substitute for the familiar semaphore system which, it is believed, will be entirely displaced in course of time.

The new system is electrically worked and is declared to be simplicity itself. The engine as it travels along the line comes into contact with an apparatus, fixed to the track, which is worked from the signal box and sets in motion a form of mechanism on the engine. Instead of the engineer having to look out for his signals, they declare themselves to his ear unmistakably. "Line clear" is expressed by the blowing of a whistle, which continues until the engineer with his own hand turns it off. Both bell and whistle are fixed inside

the engine cab, close by the engineer as he stands to his lever, and should afford a more telling means of notification than a dial on which signs appear. The substitution of audible for visible signals would relieve engineers of the strain of perpetually looking out for any particular signal or lamp.

The apparatus is so constructed that heat. But by keeping the stone wet if anything went wrong anywhere the his mother first mentioned the idea of we introduce a film of water between whistle signal would operate. The a magazine for the blind to him about it and the metal, which causes the lat- chief value of the audible signals would opening over a tucked and shirred ter to fall off as soon as it revolves to be found in foggy weather, and the chemisette of white chiffon, a touch of the underside of the stone, which is new system is therefore of particular importance in a country so fog afflicted as England is.

A Handy Metallic Ladder.

Only those who have had the expe rience of going up or down a rope ladder know how trying it is. It would be almost impossible for any nervous person to attempt it without falling.

LADDER USED AS FIRE ESCAPE. Being light in weight, the ladder natu-

the end is not secured to something. Generally it is not possible to do this. A ladder which theoretically seems to be far superior to a rope ladder has mechanic. The accompanying illustration clearly shows its construction. It is a series of alternate hand holds and steps made out of wire rods bent to shape. An additional advantage lies in the fact that this ladder is made in sections. At the top of each section is a threaded opening to receive a corresponding threaded extension at the end of the section above. In this way the ladder can be made any desired length very quickly.

Night For Medical Treatment. Medical treatment is much more effective by night than in the daytime. according to a French physician, Dr. Laufer. In an address recently delivered before the Societe Therapeutique of Paris he called attention to the fact that disease is most active at night and that, notwithstanding this, we give most of our treatment, whether by drugs or otherwise, by day. This he regarded as a mistake.

VOGUE FOINTS.

Migh Buckles and Velvet Ribbon Trim Fall Gewns.

Even upon street frocks and apparently more appropriately so than upon the house gowns do velvet ribbons obtain as chief trimming adjuncts this fall. They appear in single rows in very wide widths or else in groupings of narrow ribbons, three to nine rows in each group.

A high buckle upon one broadcloth gown of royal blue color is the piece de resistance of the costume. It is diamond shaped, fully six inches wide and made of large blue brilliants set in silver rims placed in turn upon; a; dull black jetted band. Trimmings of blue velvet ribbon in groups of three rows each were very attractively arranged on skirt and jacket, but the feature of this costume which caught and held the eye was the buckle that, placed upon the front, reached nearly to the bust line.

Another novelty seen in a bronze green cloth costume was the mandolin shaped jacket. The skirt was modeled in overskirted effect obtained by four well cut gored flounces arranged to give a plaited effect in front. A tan crepe de chine blouse of the washable variety was covered by mandolin shaped crossed fronts held in place by black jet buttons set upon insets of white

broadcloth. Three little curved sections of čloth barely covering the top of the arm passed for sleeves, illustrating again and even more forcibly the continuation of this fashion of short sleeves.

Dressy waists as well as entire cos: tumes for autumn show short sleeves. Even those smart tailored flannel waists for autumn outing and sporting wear are shown with the short cuffed sleeve which characterized the summer "shirt." A dainty white flanuel model is built with Gibson plaits and fullness dressiness afforded by ties of gold colored ribbons. The ends are weighted with two round green imitation jade balls, which fall from underneath a narrow square collar edged with gold soutache braid and embroidered with gold stars. The sleeves are quite simply designed and have natty little cuffs decorated to match the collar; A greater elaboration than we have seen for several seasons past will prevail, it is prophesied, upon the silk and crepe de chine waists that are to come later in the season; but, like the line fisher-

man, we will wait with patience to see "what shall we see." The hat illustrated is one of the smartest models for all round service able wear. It is a mushroom sailor carried out in short haired havy blue beaver. A chou of blue velvet and two atiff wings showing beautiful blendings of soft colors shading from blue to rosy pinks are placed at one side of the

model. The Ideal Hostess. She must make you feel individually

that you are the favored guest.

She must make you feel perfectly at She must see everything, and yet possess the art to see nothing. ----

She must never look bored. She must know how to get congenial. people together. She must know how to keep conver-

sation always going. She must never let any one he slighted or overlooked.

She must know when to ask the aman teur musician to display his or her. She must be perfectly unselfish about

her own talents. She must remember that nothing is so tiresome, so surely death to all enjoyment, as the feeling that one is being entertained.

How to Clean Rings.

A sharp pointed implement should never be employed to clean rings, as it loosens the stones. Soak them in liquid ammonia a whole day, and the dirt will float out. Afterward they should be polished with a soft cloth. It is a good plan to keep rings in sawdust, as it enables the gems to retain their brilliancy. Warm water and a little prepared chalk are all that are

Tit For Tat.

required to clean plain or chased rings.

"If nature had made me an ostrich," said old Grouch, "I suppose I could eat your cooking."

"Wouldn't that be nice?" answered his imperturbable spouse. "Then I could get some feathers for my hat?"
